

# CERTIFICATE OF CONFORMITY

This is to certify that

The AL Edge™, EZ Edge™ and Vent Edge™ products supplied by Edging Systems (NZ) Ltd.

## Product description

AL EDGE is a 'Pre-Painted' soft edge, manufactured from Aluminium strip coil, available in widths from 65mm to 130mm.

EZ EDGE is a malleable Aluminium strip coil, perforated & fully backed Poly-Isobutylene rubber covering to perforations, available in widths from 43mm to 63mm to suit. Corrugated and Trapezoidal materials are available up to 103mm upon request.

VENT EDGE is the same malleable Aluminium strip coil perforated & partially backed Poly-Isobutylene rubber covering to perforations. The Polyisobutylene has been positioned on the soft edge to allow three-quarters of the edging to breathe, thus complementing the natural passive ventilation capabilities of the roof space beneath.

It is available in industry standard 63mm width.

## Complies with the New Zealand Building Code:

Performance Clauses B2.3.1 (b) for the base materials & (c) for the coating system

Performance Clause F2.3.1

Contributes to a building meeting Performance Clause E2.3.2

Compliance with other clauses have been considered and found not applicable.

## Subject to the following:

### Limitations of use -

A. All designs and construction shall be as described within the Product Technical Statements [versions 1](#) available from the manufacturer's on request and, all other uses are outside the scope of this certificate.
