

CERTIFICATE OF CONFORMITY

This is to certify that

The HYDROPAVER® Range of Permeable Pavers

www.jas-anz.org/register

Product description

The HYDROPAVER® ceramic pervious pavers have the ability to both retain and infiltrate water. The pavers are slip resistant, ceramic pavers that combine high permeability with high compressive strength, mostly supplied in sizes 300x300x55mm, 600x300x55mm and 100x200x55mm. They are available in a range of colours.

Product purpose or use

HYDROPAVER® ceramic permeable pavers provide a hard surface for pedestrian and vehicular traffic in a variety of situations including footpaths, vehicle-parks, plazas, gardens and patios. HYDROPAVER® pavers are also designed for use where the permissible area of impermeable surface surrounding buildings is limited by local planning requirements. The substrate for the pavers shall be subject to specific design to allow for intended traffic, drainage and water retention.

Compliance with the New Zealand Building Code includes:

Performance Clause B1.3.2, B1.3.3 (b) & (j)
Performance Clause B2.3.1 (a)
Performance Clause D1.3.3 (d)
Performance Clause E1.3.1 and E1.3.3 (a) to (f)
Performance Clause F2.3.1
Compliance with other clauses have been considered and found not applicable.

Subject to the following:

Limitations of use -

- All designs and construction shall be within the requirements and the guidelines set out in the HYDROPAVER® Technical Manual v3.0 dated 20 December 2017, which includes the designer's responsibility to take into account closeness to building foundations, boundaries, retaining walls, basements, groundwater table, overall stability of land etc. All other uses are outside the scope of this certificate;
- Accessories and prepared substrates are to comply with that specified in the HYDROPAVER® Technical Manual v3.0, available from the manufacturer's web site www.jagas.co.nz and the HYDROPAVER® Building Product Quality Plan v2.0;
- Installation shall be performed by HYDROPAVER® trained and approved installers;
- Installation and maintenance - where required - of the HYDROPAVER® system, shall be in accordance with the HYDROPAVER® Building Product Quality Plan v1 dated April 2016;

Conditions of Certification -

- The Building Product Quality Plan for the HYDROPAVER® range of permeable pavers shall be reviewed and subject to audit at their head office and building sites by the issuer at least once a year;
- This CodeMark Certificate shall be revalidated each year from the date of issuance
- This CodeMark Certificate is subject to S15 of the Building Product Certification Regulations 2008.

Technical information:

Information that forms part of this certificate or the basis for certification is available from the issuer on request and may be subject to a fee.
